

ROTOFIT®

The simple, total mobility of the system lets you position it perfectly on the various groups of muscles, fitting immediately to different physical conformations. ROTOFIT, A CLINICALLY TESTED SYSTEM

To obtain deep, effective muscular stimulation, it is fundamental that the muscle bundles be worked taking into account their shape, dimension and positioning. Rotofit is the patented system that allows immediate placement of the electrode pairs on the various muscle groups, depending on their anatomy. Furthermore, the sliding electrodes in the Rotofit system allow distance setting and are completely positionable, for considerable enlargement of the surface

treated, with evident advantages for problems like cellulite, which tend to cover extensive areas. The Rotofit system, contained in the practical TUA 360° carrying case, is the most effective system for exercising passive gymnastics. If used regularly, even for just a few minutes a day, you will see evident, appreciable results from the first applications. Clinical experiments, even at the University level, based on subjective, objective and instrumental

parameters (physical measurement, contact thermography, analysis of muscular enzymes, photographic documentation), have demonstrated the effectiveness of the TUA 360° Rotofit system in combatting localized cellulite, in slimming and tonifying the thighs, in firming, shaping and strongly lifting the buttocks, in slenderizing, tonifying and flattening the stomach, and in firming and lifting the breasts, acting on the underlying support muscles.

TUA 360° : A COMPLETE SYSTEM FOR EXCEPTIONAL RESULTS

TUA 360° has been designed and built with the utmost attention to quality and safety, conforming to the strictest international standards and earning prestigious quality trademarks.

VuP'Esse
BODY CARE

TUA AND ROTOFIT ARE REGISTERED TRADEMARKS OF VUPIESSE ITALIA

THE TUA 360° ROTOFIT SYSTEM INCLUDES:

- TUA 360° ROTOFIT SYSTEM ELECTRONIC BELT FOR PASSIVE GYMNASTICS
- 9 V ALKALINE BATTERY ALREADY CONNECTED
- ADJUSTABLE EXTENSION WITH A VELCRO FASTENER
- WATER CONTAINER
- SPARE SPONGE KIT
- OPERATION AND APPLICATION MANUAL
- CARRYING CASE
- ACCOMPANIED BY A DEMONSTRATION VIDEOTAPE

THE ELECTRONIC BELT FOR PASSIVE GYMNASTICS

360°

ROTOFIT

TUA 360° is an electronic unit for passive gymnastics

completely contained in a practical belt made of soft synthetic material, utilizing the innovative ROTOFIT system (patented), scientifically developed and clinically tested. The set consists of an electronic control unit which generates a train of modulated square wave impulses specifically studied to obtain an effective, pleasurable muscular contraction, plus two pairs of ROTOFIT system electrodes.

• TUA 360° is easy: after having wet the electrodes sponges with normal water from the water container supplied, they are positioned on the part of the body involved, the velcro is fastened and TUA 360° is ready for use. The impulses output

and intensity are

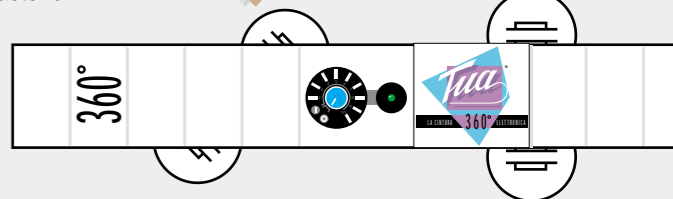

regulated by means of a special knob; a green LED lights up to signal impulse emission. An adjustable velcro extension allows TUA 360° to be positioned in any area of the body.

• TUA 360° is battery-operated and is supplied with a 9-Volt alkaline battery which lasts for

approximately 40 hours and can be immediately replaced.

• TUA 360° wherever you want: the handy belt form and lack of external units, connector wires or plugs means it can be used easily and immediately; just put it on. It can be used in any situation: at home, at work, in the car - anywhere.

• TUA is made by a leading manufacturer of professional equipment widely used in hospitals, medical, physiotherapy and beauty medicine centres.

TUA for slimming, toning and flattening the tummy. TUA for firming and lifting the breasts. TUA for firming, shaping and strongly lifting the buttocks. TUA for fighting localized cellulite and slimming and toning the thighs. TUA, for relaxing and toning all of the muscular system as well.
