

TURNING BACK THE YEARS

WE have over 50 facial and neck muscles. As we grow older, our facial muscles lose their youthful elasticity, volume and firmness. And the skin on these facial muscles start to sag, causing many common ageing signs such as droopy cheeks, eyebrows and eyelids, loosening of the neck skin, thinning of the lips and etc.

Exercise is the only natural

and proven effective way to fight and reverse the signs of ageing. We can actually firm our face by doing regular "facial exercise" or "yoga for the face", as practiced extensively in the US and Britain as a non-surgical facelift solution to look younger.

TUA VISO is specifically designed and developed to give you optimum anti-ageing benefits with exercises and toning of

facial muscles. With TUA VISO, you can reduce wrinkles, saggy skin, double chins, eye bags and other ageing signs in as little as two weeks.

In an independent clinical trial conducted at Bologna University, there was visible facial lift and redefinition after eight to 10 sessions of TUA VISO – two to four minutes per area. Portable and easy to use, thanks to a compact and light-

Easy to use: Anyone from the age of 20 can use TUA VISO to help erase the signs of ageing.

weight design, TUA VISO can be used anywhere at anytime at your own convenience.

The TUA VISO Facial Exerciser will give back volume and firmness to the delicate facial muscles, and thereby lift facial muscles, tighten neck and under-chin areas, give fullness back to lips and enhance the eye area. The effect of micro currents through your skin will help your body stimulate collagen and elastin production; after which you will start to see a more glowing and radiant complexion, with lesser lines and wrinkles.

Users of TUA VISO are from their 20s up to their 70s. For matured users, TUA VISO helps to erase the signs of ageing. Many younger users use TUA VISO to reduce eye bags and achieve a slimmer face shape.

FDA-approved, TUA VISO facial exercise device is widely sold in the US and Europe. It is 100% designed and made in Italy, and employs advanced electrical stimulation technology that generates special

pulses to give our facial muscles precise and effective exercise. You will feel pampered and refreshed after experiencing the pleasant stimulation treatment. It is also economical, easy-to-use and highly effective.
